

## GAMING CORPS EXPANDS PARTNERSHIP WITH ENTAIN

**Gaming Corps AB (publ) ("the Company" or "Gaming Corps") has expanded its partnership with Entain, one of the world's largest sports betting and gaming groups. The expanded partnership adds more markets, including the important Canadian market, and also spans over additional Entain brands, adding them to Gaming Corps distribution network.**

Gaming Corps has been working with Entain since 2022 and the two companies now expand the partnership. The expansion means Gaming Corps's content will become available on more markets as well as at additional Entain iGaming brands.

Canada is a major focus for the extended partnership. Gaming Corps went live with BetMGM in Ontario in December 2025, followed by a wider Entain rollout in the province in March 2026. The two companies are now preparing for the opening of Alberta's regulated iGaming market in July, with Gaming Corps's content ready to go live from day one with BetMGM. Additional market launches in Portugal, Spain and New Zealand are also being prepared.

"Entain is one of the biggest names in global gaming, so to see our relationship grow in this way is a clear sign of the trust, performance and commercial value we have built together during these years. They will over time continue to take our gaming content into more territories, across more of its brands, and that says a lot about where we are as a business today. I am very much looking forward to our future together", says Juha Kauppinen, CEO of Gaming Corps.

Entain is one of the world's largest sports betting and gaming groups, with a portfolio of more than 30 well-known brands. The company holds more than 100 licences across over 30 jurisdictions and employs approximately 28,000 people globally. Entain generated more than £5 billion in Net Gaming Revenue during 2025, 100 percent originating from regulated or regulating markets.

"Gaming Corps has been a valuable partner over the last four years. The strength of the relationship lies in how easily the content can be activated around different commercial priorities, from supporting new market entries to adding timely releases around key calendar moments. The studio understands the need for content that is flexible, relevant and easy to position locally, and we are pleased to continue building on the partnership", says Obdulio Bacarese, Global Gaming Director at Entain.
