### Management comment:

We could call the third quarter of 2020 as back to new normal where retail outlets are opened, employees returned to the office and during quarantine suspended services are reordered. The Bank of Lithuania forecasts that this year Lithuania's GDP will shrunk by just 2 per cent and will recover next year with a 3.1 per cent growth in GDP.

On the other hand, we still have cross boarder travelling restrictions that affect our roaming services. The pandemic has also changed pattern of customers' behaviour and purchase preferences. We observe an ongoing demand for connection speed and capacity, cloud and data center solutions for businesses, laptops and TV sets for home.

Intake of new customers continued during July-September 2020. The number of upgraded prepaid mobile service subscriptions increased by 19 thousand and post-paid – by 10 thousand, while number of broadband Internet and TV service customers increased by 2 thousand each.

### Over the last twelve months:

- number of mobile service subscriptions grew by 3.4 per cent up to 1,384 thousand,
- number of TV service users increased by 4.6 per cent up to 251 thousand,
- number of FTTH Internet connections went up by 1.7 per cent up to 295 thousand.

Revenue for the third quarter of 2020 – similar as a year ago – exceeded EUR 100 million. Decline in roaming business was compensated with new mobile customers' intake and increased ARPU. New contracts for IT solutions led to a double digit growth in revenue from IT services. New customers and increased ARPU generated higher revenue from Internet services, while lack of live sports' broadcastings slightly slowed down the growth in revenue from TV services.

Over the year, comparing the nine months' period of 2020 with the same period in 2019:

- revenue from IT services grew by 21.8 per cent,
- revenue from TV services increased by 15.4 per cent,
- comparable (like for like) revenue from billed mobile services was up by 4.7 per cent.

Increased operations efficiency led to a record high quarterly EBITDA (excluding non-recurring expenses) standing at a 35.4 per cent margin. Improved EBITDA in combination with positive changes in working capital generated strong cash flows. This year capital expenditure is lower than in 2019. For the nine months of 2020, capital investment amounted to EUR 37.3 million, 12.2 per cent less than during the same period a year ago.

The quarantine proved that digitalisation of our customers' experience is the right strategy and it should be accelerated while not losing the quality and customer focus. The recent secret buyer's test performed by independent researchers showed that our customer care at retail shops compared with the other operators in Lithuania is the best in class.

The Chair of the Board, Emil Nilsson, following his departure from Telia Company has submitted his resignation letter to the Board of the Company. The last day of him in office will be 21 October 2020. He chaired the Board of Telia Lietuva for almost two years.

Note. \*Starting from 2020, customers' contributions for insurance of mobile devises are recorded at net value (excluding costs) while earlier it was recorded at gross value (including costs), thus comparable revenue from billed mobile communication services for the third quarter of 2019 and the nine months of 2019 were EUR 25,843 thousand and EUR 75,411 thousand, respectively. Accordingly, comparable revenue from billed services for the third quarter of 2020 increased by 4.7 per cent and for the nine months of 2020 – by 4.7 per cent over the same period a year ago. Total comparable revenue from mobile services over the year for third quarter of 2020 decrease by 0.9 per cent while for the nine months of 2020 increased by 2.8 per cent.

Intake of new customers and new contracts during the third quarter of 2020 drove the revenue from Internet, TV, IT and billed mobile services up, while loss of roaming revenue stream due to limited travelling and lower volumes of voice transit resulted in flat **total revenue**.

Total revenue for nine months of 2020 was less affected by lower revenue from roaming and voice transit services. Share of revenue from fixed and mobile communication services amounted to 45.9 and 32.8 per cent, respectively, from the total revenue for the nine months of 2020. Share of revenue from equipment sales was 21.3 per cent. The pace of decline of fixed telephony lines in service slowed down. During the third quarter of 2020, the number of lines eased by 7 thousand, while over the last twelve months it went down by 39 thousand. Revenue from voice transit service during July-August of 2020 was by almost a fifth less than a year ago and dragged down the total revenue form **voice telephony** services. Revenue from retail voice telephony services went down by 13.8 per cent.

New contracts for virtual private network (VPN) solutions, computerised workplace management and video surveillance systems installation and maintenance pushed the revenue from **IT services** up.

**Equipment sales** are higher than a year ago with exceptional increase in laptops and TV sets sales. Sales of mobile devices are returning back to pre-Covid volumes.

### New IFRS 16 "Leases" effective as of January 1, 2019

The Company apply the new standard using the modified retrospective approach, which means that comparative figures are not restated. The cumulative effect of applying IFRS 16 recognized at 1 January 2019. The lease liabilities attributable to leases which have previously been classified as operating leases under IAS 17 are measured at the present value of the remaining lease payments, discounted using the incremental borrowing rate as of 1 January 2019. The Company recognize a right-of-use asset at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments related to the lease, recognized as of 31 December 2018. The Company's long-term operating leases are recognized as non-current assets and financial liabilities in the consolidated statement of financial position. Instead of operating lease expenses the Company recognize depreciation and interest expenses in the consolidated statement of comprehensive income. Lease payments affect cash flow from operating activities (e.g. interest, low value asset leases and short-term leases), and cash flow from financing activities (repayment of the lease liability) in the cash flow statement.
