

For Danish, Arctic and Nordic security: Rovsing AS and Marble Imaging GmbH join their forces securing availability of sovereign Earth Observation capacities from 2027 onwards

Rovsing AS (Glostrup, Denmark) and Marble Imaging GmbH (Bremen, Germany) join forces to form an agile Nordic-European Earth Observation task force providing secured and tailored satellite data-based services to Denmark, the Arctic and Nordic regions from 2027 onwards.

Both companies have signed an agreement for marketing Earth Observation data and AI-supported analytics in this region, which leads to an enhancement of their collaboration in Denmark and the Nordics, with Marble Imaging as an agile service provider and Rovsing with its seasoned space mission and high-quality expertise.

Rovsing and Marble see their key success factors in assuring robust tailored and scalable geo-data solutions, based on a rapid development cycle, providing immediate added value in operations to institutional and commercial clients. The scope will cover Denmark and the Nordic countries, especially the Arctic, Baltic Sea and the continuous monitoring of critical infrastructures and activities.

“Our data and AI-supported analytics enable the accurate detection and classification of objects, as well as the identification of maritime anomalies, empowering timely and informed decision-making”, says Alexander Epp, Co-Founder of Germany-based Marble Imaging GmbH. “Together with Rovsing, we are confident in delivering significant strategic value to strengthen the security, sovereignty, and situational awareness of our Nordic partners.”

Ulrich Beck, Chairman of the Board of Rovsing A/S states:

“The collaboration between Marble Imaging and Rovsing is a further step to enhance access to data capabilities as provider for agile, scalable and tailored geo data solutions for institutional and commercial clients. Marble Imaging has built here a robust portfolio meet a rapidly increasing demand in these times. For Rovsing, bringing in the decade long competence with space systems and missions, this is a key step towards sovereign solutions for Denmark and Nordic countries, enhancing resilience in this strategic environment. Rovsing A/S as a Danish company takes its role as responsible corporate citizen in this region.”

As partners, Rovsing and Marble Imaging will pool resources and activities in this region to build a scalable business model, from providing end-to-end data-driven EO capabilities with flight-proven satellites and ground infrastructure, with AI-powered operations and advanced analytics. Activities will be launched with respective pilot projects and reaching out to further regional partners.

Both companies will keep you posted, looking towards a customer panel, planning an event towards end of Q3 2026 in Copenhagen. A save-the-date will follow soon.
