Instalco company signs framework agreement with Region Blekinge

Instalco's subsidiary Inmatiq has signed a framework agreement with Region Blekinge for building automation services. Under the framework agreement, Inmatiq will provide automation solutions primarily for hospitals and healthcare centres in Blekinge.

The agreement runs for two years, with an option to extend it for a further two years. The estimated contract value for Instalco is approximately SEK 30 million over the contract period.

"We are proud to have been entrusted to deliver services to a critical public service operation where very high demands are placed on operational reliability. We are particularly pleased that the procurement process placed a strong emphasis on quality and expertise. This is fully in line with how we work and develop our operations within Inmatiq," says Fredrik Hautau, CEO at Inmatiq.

Region Blekinge manages approximately 275,000 square metres of properties, primarily hospitals and healthcare centres. Inmatiq's assignment includes development, refurbishment, programming, commissioning, modernisation and technical management of automation systems to ensure reliable and energy-efficient building operations.
