

# W5 Solutions wins framework agreement worth up to SEK 40 million with FMV for thermal targets

**W5 Solutions' business area Training has signed a framework agreement with the Swedish Defence Materiel Administration (FMV) for the delivery of thermal targets for advanced live fire training. The estimated value amounts to SEK 40 million, with call-offs expected during the period 2026–2030.**

As thermal sights are increasingly used in operational environments, military units must be able to train with equipment that mirrors actual conditions. The thermal targets are fully integrated with, and powered by, the company's existing target systems. This enables realistic training scenarios where soldiers train using the same type of technology as is employed in real operations.

"Military units must be able to train the way they operate. Our thermal targets enable highly realistic training that aligns with the requirements placed on modern forces," says Toralf Johannessen, Head of Business Area Training, W5 Solutions.

## About W5 Solutions

W5 Solutions' vision is to become the leading global provider of sustainable defence technology. The company develops and delivers cutting-edge solutions that strengthen both its own forces and those of its allies. Their solutions in Integration, Training and Power are designed with a focus on sustainability and innovation, making them a reliable partner for defence and security agencies worldwide.

Founded in 2018, with a heritage dating back to 1940, W5 Solutions is headquartered in Stockholm.
