GomSpace signs 3.8 MEUR multi-phased partnership agreement with European space company specializing in advanced systems and critical technology

The initial agreement establishes a new customer relationship and framework for long-term cooperation.

GomSpace has signed a multi-phased partnership agreement with a new commercial customer in the EMEA region, specializing in advanced systems and critical technology. The initial scope of the agreement is valued at approximately 3.8 MEUR (42.2 MSEK), with deliveries scheduled from late 2026 and throughout 2027.

The agreement covers satellite missions, mission services, platform kits and standard products, positioning GomSpace as a key technology partner in the program and establishing a framework for long-term cooperation and potential future program expansion.

"This agreement establishes a framework for cooperation that supports the customer's space ambitions through access to GomSpace's broad portfolio of satellite products, platforms and mission services," said Oliver Schiewe, Vice President of Satellite Systems. "We are pleased to support the program and look forward to working closely with the customer on the delivery of the initial phases."

The agreement represents GomSpace's first contract with this customer and establishes a foundation for long-term collaboration and potential future program growth. Additional phases and potential program expansions will be evaluated as the collaboration progresses.

About GomSpace Group AB

Founded in 2007, GomSpace is a global provider of small satellite solutions with customers in more than 60 countries. The company's business operations are mainly conducted through the wholly owned Danish subsidiary, GomSpace A/S, with headquarters and operational facilities in Aalborg, Denmark. GomSpace also has key operations in Luxembourg, France, and the United States. GomSpace develops and delivers advanced systems and services that enable governments, commercial enterprises, and research institutions to achieve their objectives in space. The company's expertise covers satellite subsystems, complete small satellite missions, and satellite operations, providing solutions that support smarter, faster, and more affordable access to space. The company is listed on Nasdaq First North Premier Growth Market in Stockholm under the ticker GOMX. FNCA Sweden AB is the Company's Certified Adviser.
