Update on NOS merger timeline and EMIR application process

IT 87/13

Dear Recipient,

[Due to the postponement of NASDAQ OMX Clearing's EMIR license approval](#), the merger and migration of NOS Clearing ASA into NASDAQ OMX Clearing AB, which was planned to take place on the 2nd of December 2013, will be delayed, but not earlier than February 2014.

The onboarding and member readiness activities for the planned NOS migration will continue as planned, this to ensure that both NOS and our members have satisfied the mandatory preparations, regardless of when the actual merger takes place. For more details, please go to the [NOS Onboarding Web page](#)

The postponement of the NOS clearing migration will not affect the technical upgrade of Genium INET to 3.0201. The summaries of changes outlined in this [IT-Notice 65/13](#) will be implemented as planned on 25th of November 2013.

The Swedish and Norwegian Electricity Certificate day future contracts in SEK and EUR launch dates will remain as published in this [IT-Notice 87/13](#).

Genium INET External Test System 4 (Ext4) - Including NOS data migration
EXT4 is available for test every workday from 08.00 to 15.00 CET until go live. The maintenance window is between 06.00-1200 CET each Wednesday.

Genium INET External Test System 1 (Ext1) - Will be available from November 8th for 3.0201 technical release (excluding NOS data migration)
EXT1 is available for test every workday from 08.00 to 15.00 CET. The maintenance window is between 06.00-1200 CET each Tuesday.

The member area <http://www.nasdaqomx.com/transactions/technicalinformation/geniuminet> contains the newest project related documentation and updates regarding Genium INET protocol specifications, member applications, enhancements, project updates, testing and certification necessary for successful member, broker, and Independent Software Vendor (ISV) integration.
