IT – INET Nordic – Additional Market Segments for Warrants and Certificates

Nasdaq Nordic is planning to add six (6) additional market segments for warrants and certificates on First North Sweden (Norwegian segments) and First North Denmark.

The market segments are available in INET Test NTF as well as GCF TST4 and are planned for production activation on September 22, 2026.

Implementation details

Based on issuer request, three additional market segments with continuous trading hours between 09:00 and 17:25 CET will be added under First North Denmark. Similarly, three market segments for Norwegian instruments will be added under First North Sweden with the same continuous trading hours. This addition enables Indicative Close Price to be calculated at an appropriate time for instruments that have a Swedish/European underlying and quoting hours aligned to Swedish/European market.

Exchange (segment MIC)	Market Segment symbol	Market Segment name	Sequent	GCF TST 4 ID	GCF PROD ID
First North Denmark (FNDK)	CPH SE WAR	CPH SE Warrants	307	6657244	7355954

* Follows Norwegian Holiday schedules

During Norwegian half days, the Post-Trading Phase for the Norwegian market segments under First North Sweden will start at 12:55 CET and close at 13:30 CET.

Instruments

Instruments to be listed will be communicated via Exchange Notices. List of test order books can be requested by contacting EMO@nasdaq.com.

The instruments can be of the following type:

GCF Instrument Type	Instrument Subtype	MiFIR identifier
Warrant	Plain Vanilla Warrants, Mini Futures, Turbo Warrants	SDRV
Warrant	Leverage Certificates	SDRV
Warrant	Tracker Certificates	SDRV

Instruments on the new market segments will be traded in monetary prices.

Tick size table

The default tick size table for these instruments will be table Certificates, DKK, i.e. table 220. Other applicable tick size tables are detailed within INET Nordic Market Model.

Turnover lists

The orderbooks within these segments will belong to the existing turnover lists used by warrants, leverage certificates and tracker certificates.

GCF TIP

New market segments will be added to Nordic Equity market data products by default.

Existing reference data TIP messages used for these instruments will be *BasicDataDerivative, BasicDataTradable and BasicDataTradableSupplementary.*

Protocol specifications

These changes have no impact on the INET protocol specifications. Current and future versions of INET protocol specifications are available at the Nasdaq Nordic Technical Information website.

Nasdaq Nordic Member Rules and INET Nordic Market Model

These changes have no impact on the Nasdaq Nordic Member Rules. They will be reflected in line with the production activation date in the INET Nordic Market Model.

Nasdaq Nordic Member Rules and the INET Nordic Market Model are available at Nasdaq Nordic Member Rules and Regulations website.

Implementation schedule

INET Test (NTF) – available

INET Production – September 22, 2026
