

IT – INET Nordic and Baltic – FINAL REMINDER: Verification of failover functionality in the INET Nordic Production system

As previously communicated in [IT-Notice](#), Nasdaq Nordic and Nasdaq Baltic invites participants to a site failover test in the INET Nordic Production system. The site failover test will be performed on **Saturday the 25th of October 2025**. The INET Production system will be available for login only to all client ports; OUCH, FIX Order Entry, FIX Trade Reporting and their respective FIX DROP protocols, and all ITCH related protocols. GCF will not be part of this failover test. No markets will be available, and no other type of business functionality will be enabled.

Participants are recommended to take advantage of this opportunity to test their ability to failover to the Nasdaq site B (STOCKHOLM SOUTH) secondary datacenter. Please note that only participants that have connectivity access to site B can participate in this test, i.e. Co-Lo customers with access only to site A (VASBY) can't participate.

Time schedule (CEST)

| | |
|-------|--|
| 10:00 | INET Nordic system available for login in the normal configuration |
| 11:00 | Failover initiated on site A (all site A gateways disconnected) |
| 11:30 | Failover to site B completed at approx. 11:30 CEST, and participants can test and verify their automatic or manual site failover ability to site B |
| 13:00 | Test completed, INET Nordic system shutdown |

Execution

The INET Nordic Production system will be available for login at 10:00 CEST, in normal configuration mode with site A as the primary site and site B as the secondary/failover site, allowing for connectivity to primary ports at site A, Co-Lo configured failover ports at site A and dual site configured failover ports at site B. Participants shall login to primary ports at site A to be able to test their failover ability to site B during the test. The markets will be in closed state, with login allowed but no other functionality. Markets will remain closed throughout the test.

At 11:00 CEST, a controlled failover from site A to site B will be performed, simulating a complete loss of INET Nordic on site A. Connectivity to site A will not be available, only failover ports at site B will be available when failover is completed at approx. 11:30 CEST. Please note that you are required to have connectivity access to site B to be able to test and verify your failover capability, hence Co-Lo customers will not have access to their primary and secondary/failover ports in INET Nordic at this stage. Co-Lo customers who have arranged for connectivity between sites, via the Nasdaq Express Connect service or an external connectivity provider, and have dual site configured failover ports/services enabled, can participate in the site failover test.

At 13:00 CEST, the INET Nordic Production system will be shut down and configuration restored to normal operation for Monday.

Communication plan

IT Information messages (IT-Notices) will be sent out only if there are any deviations from the planned times. During the failover test, Nasdaq will communicate with registered participants via e-mail.

Participants are advised to ensure subscription to the 'IT Information – Cash Equity' and 'IT Information – Market Data' messages. IT Information subscription services are available at <https://www.nasdaq.com/european-markets/it-notices>.

Registration and Reporting

Participants shall register for the test by completing and submitting the Registration and Report document to technicalrelations@nasdaq.com **no later than the 17th of October 2025**. This will ensure proper contact information is collected that will be used during the failover test.

After the failover test has been completed, we kindly ask participants to report their results to technicalrelations@nasdaq.com using the same Registration and Report document. **The Registration and Report document can be found attached to this IT-Notice.** Please send the failover result report at your earliest convenience, but no later than 29th of October.

The result of the test, including member participation, will be reported to the Financial Supervisory Authorities in the Nordics.

Please ensure this message is forwarded to your organization's Compliance Officer.

Technical support

Nasdaq European Market Operations will be available during the failover test via the normal support channel:

Exchange Services

Tel: +46 8 405 7700
