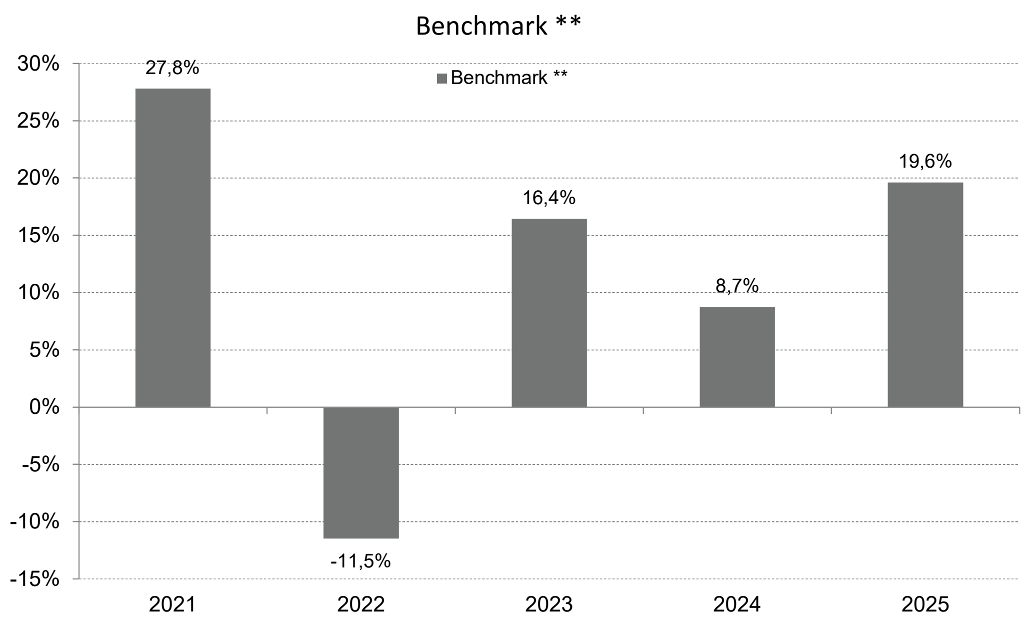
Appendix to the Prospectus for **Storebrand Europe Index**

This is an appendix to the fund's prospectus with supplemental information to investors trading the fund at Nasdag Copenhagen. An application has been filed with the stock exchange and the first day of trading is expected to be 12 August 2026.

Fund name and share class:	**Storebrand Europe Index A5 (DKK)**
ISIN:	NO0013711408
Trading/settlement currency:	DKK
Fund type:	UCITS
Domicile:	Norway

Historic performance*



* The fund has not been in existence for a full calendar year, and hence, there is not enough return history to show past performance..

** The benchmark is MSCI Europe Net Returns expressed in Danish Crowns (DKK) based on year end exchange rates between USD and DKK.

Future returns will depend on market developments, the fund manager's skill, the fund's risk profile, ongoing charges and transaction costs. The return may become negative due to negative price developments. Further information about the fund can be found at www.storebrandam.com.

Subscription and redemption for Danish investors

The UCITS-shares of the fund are fully transferable and available for trading on Nasdaq Copenhagen. The shares are negotiable instruments and there are no restrictions on marketability. Net Asset Value (NAV) is published on Nasdaq Copenhagen and available at their web page https://www.nasdaq.com/european-market-activity/funds. Jyske Bank is acting as market maker by offering bid and ask prices multiple times throughout any opening hours at Nasdaq Copenhagen.

The UCITS-shares are issued through Euronext Securities Copenhagen, Weidekampsgade 14, DK-2300 Copenhagen S. The UCITS-shares are settled customarily two days after transaction, and at the same time as delivery or registration at Euronext Securities Copenhagen. The UCITS-shares are registered by name in the association's books by Euronext Securities Copenhagen Investor Services.

The UCITS-shares purchased on Nasdaq Copenhagen cannot normally be sold directly back to the issuer of the UCITS-shares, Storebrand AM. Instead, the UCITS-shares can be sold back to the market maker. Investors trading UCITS-shares on an exchange may be required to pay fees in connection therewith. In addition, investors may pay more than the existing intrinsic value when they buy UCITS-shares, and receive less than the current intrinsic value when they sell them.

Other matters relevant to Danish investors

Danish investors hold their fund ownership through Euronext Securities Copenhagen’s nominee account, and hence, parts of the prospectus sections are only partially or indirectly affecting the Danish investors via Euronext Securities Copenhagen. The sections ‘Unitholders’ rights and obligations’, ‘Publication of net asset value (NAV)’, ‘Calculation of value’, ‘Subscription and redemption’ and ‘Savings agreement’ are examples on matters which for the most part is relevant for investors in Storebrand Asset Management’s unitholder register, and not Danish investors through Euronext Securities Copenhagen, as such.

Swing pricing is relevant for first-hand issuance and redemption of units, and not second-hand sales based on intrinsic values (IVs). Hence, the swing factor applied to the end of day NAV is not directly relevant for Danish investors trading on Nasdaq Copenhagen, as such trading are based on intrinsic values (IVs), and not the official NAV set for the fund after close of the underlying markets. The swing factor is relevant for the market maker which subscribe or redeem fund units directly with the fund. The swing factor may be applied to the fund’s NAV on subscriptions and redemptions to allocate transaction costs, spreads, taxes and market impact to the investors causing them, and to protect remaining investors from dilution. The exact factor is not disclosed, as it varies with market conditions and actual costs, and is regularly evaluated and adjusted to reflect such costs as closely as possible. The routine for swing pricing is carried out in accordance with the Norwegian Mutual Fund Association's industry standard on subscription and redemption, available at www.vff.no.

However, Danish investors hold ownership rights as any other investor with respect to governance, voting, benefits and no liability for the fund’s obligations. The shares held by Danish investors may be subject to corporate actions, such as mergers or dissolutions, whereas invitations to shareholder meetings are communicated through Euronext Securities Copenhagen’s Investorportal.

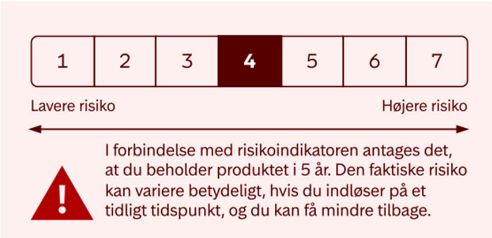
Danish investors should be aware of the tax status with minimum taxation (minimumsbeskatning) subject to the subjective tax liability in section 1(1)(5)(c) of the Danish Corporation Tax Act.

The agent, which handles the conclusion and settlement of loans, referred to in the section “Techniques for achieving effective portfolio management and application of securities financing transactions” should be understood as the securities lending agent appointed for the fund’s equity lending programme. More specifically, the prospectus states that J. P. Morgan SE – Luxembourg Branch is the agent for the lending programme. The agent’s role is to handle the practical execution and settlement of securities lending transactions: concluding loan transactions, arranging settlement, managing the return of lent shares, and assuming certain liability if shares are returned late.

The management company does currently not invest the fund’s assets in Russian companies or Russian financial instruments. Additionally, Russia is not part of the fund’s investment universe, as only developed markets are included in the fund’s reference index. For the sake of good order, we make reference to the management company’s exclusion policy on https://www.storebrandam.com/en-DK/sustainability/.

Risk and risk factors

The fund deliberately takes different forms of risk in order to increase the possibilities of returns. The value of the fund's investments is positively and negatively affected by the daily trend in the markets where the securities are traded (market risk).



The summary risk indicator indicates the level of risk of this product in relation to other products. It shows the likelihood that the product will lose money due to movements in the market. We have classified this product as 4 out of 7, which is a medium risk class. Thus, the possible losses on the future return are assessed at a medium level.

Other risks that are significantly relevant to the fund and are not included in the summary risk indicator: event risks, liquidity risks, operational risks, counterparty risks, derivative risks and currency risk. If the fund invests in securities in a currency other than the fund's base currency, the value is affected by the changes in the exchange rate. In addition, the value of your withdrawal may be affected if your local currency is different from the currency of the fund. This product does not contain any protection against future market developments, so you may lose some or all of your investment

Investment horizon

Due to the fund's risk profile, investors should be prepared for loss and/or have a sufficient time horizon for the investment in the fund. Normally, a time horizon of five years, or more, is recommended for equity funds.

Essential agreements

<u>Market maker agreement</u>

Storebrand Asset Management AS has entered into an agreement with Jyske Bank AS that the bank in Nasdaq Copenhagen A / S 'trading systems, each trading day - subject to special situations - will place prices on the Storebrand Funds with the aim of promoting liquidity in trading the funds.
