Q-Interline has received a new order from one of France's largest dairies

7.8.2026 10:40:08 CEST | Q-Interline A/S | Investor News

Q-Interline A/S can today announce that the company has received an order from one of France's largest dairies. The customer has worked with Q-Interline since 2016, when the company invested in an inline system equipped with two probes for butter analysis. With this new order, the dairy is now upgrading to Q-Interline's newest Quant platform, continuing a partnership that has spanned nearly a decade.

With this upgrade, the customer gains high analytical precision, improved performance, and a modern platform that supports dairies' increasing demands for efficient quality control and process optimization.

At the same time, the order confirms the high customer loyalty and trust that existing customers place in Q-Interline's technology. The fact that a longstanding customer chooses to upgrade to the newest generation of analysis equipment is important evidence of the value of the company's continued product development.

The order is also the result of a strong effort by Q-Interline's organization in France, which together secured the solution that best matches the customer's needs.

CEO Maja Vonsild Jørgensen states:

"We are of course very pleased that a customer who has worked with us for many years is choosing to invest in our newest technology. This confirms both the strength of our long-term customer relationships and the value our Quant platform creates for the dairy industry."

About Q-Interline A/S

Q-Interline is a technology company that develops high-tech analytical solutions for optimising process efficiency and product quality, based on infrared spectroscopy and correct sampling techniques.

The company develops both its own front-end software solutions and software for automated cloud-based monitoring of analytical instruments and mathematical calibration models.

Q-Interline is among the leading suppliers of analytical equipment to the dairy industry in Scandinavia and has delivered analytical systems to customers in 45 countries worldwide across the food and dairy industries, agriculture, pharmaceutical manufacturing, and the chemical industry.

For more than 29 years, the company has accumulated extensive industry expertise and developed innovative patented solutions for food analysis. Today, Q-Interline offers a competitive product portfolio built on leading-edge technology.

Through its solutions, Q-Interline contributes to the sustainable use of raw materials in food production while helping to ensure that the quality of produced food supports the health and well-being of both humans and animals.
