

LUNDIN GOLD REPORTS Q1 2025 PRODUCTION OF 117,313 OUNCES OF GOLD

Lundin Gold Inc. (TSX: LUG; Nasdaq Stockholm: LUG; OTCQX: LUGDF) ("Lundin Gold" or the "Company") is pleased to report first quarter 2025 gold production of 117,313 ounces ("oz") from its Fruta del Norte gold mine ("Fruta del Norte") in southeast Ecuador. Of the total quarterly gold production, 75,494 oz were produced as concentrate and 41,819 oz as doré. During the same quarter in 2024, the Company produced 111,572 oz of gold. All amounts are in U.S. dollars unless otherwise indicated.

In the first quarter of 2025, the mill processed 398,159 tonnes of ore resulting in an average throughput rate of 4,424 tonnes per day at an average grade of 10.4 grams per tonne with recoveries of 88.5%.

Ron Hochstein, President and CEO commented, "2025 is off to a strong start, marked by the successful completion of our Plant Expansion Project this quarter. Capitalizing on the downtime associated with the new equipment tie-ins, we proactively completed the relining of the SAG mill, as well as other maintenance that was originally scheduled in the second quarter, positioning us well for the remainder of the year. As a result of strategic mine resequencing and positive grade reconciliation, we have seen a higher mill head grade, which we now expect to continue through the first half of the year before moderating in the second half. We are also pleased with the initial performance of the process plant, post Plant Expansion Project, in terms of throughput and recoveries and are focused on optimizing performance in the coming quarter."
