About Sprint Bioscience AB (publ)

Sprint Bioscience develops small molecule first-in-class drug programs with a focus on oncology. With a fragment-based drug development method, the company develops drug programs in a time- and resource-efficient manner. The programs enter partnerships through licensing agreements, asset acquisitions, or research collaborations with global pharmaceutical companies during the pre-clinical phase and the company has successfully formed several agreements. The Sprint Bioscience share is listed on the Nasdaq First North Premier Growth Market and trades under the ticker symbol SPRINT. The company is based in Stockholm with operations located in Huddinge. Further information is available on the company website; www.sprintbioscience.com. Certified Advisor is FNCA Sweden AB, www.fnca.se.
