kciju Sabiedrība ELKO Grupa Management report on interim consolidated financial statement for 6 months period ended 30 June 2021

Business activities

Akciju Sabiedrība ELKO Grupa (hereinafter – the Company) is one of the region's largest distributors of IT products and solutions. The ELKO Group represents about 400 IT and electronic consumer goods manufacturers, and provides a wide range of products and services to more than 10 000 retailers, local computer manufacturers, system integrators and enterprises within various sectors in 31 countries in Europe and Central Asia. Currently, ELKO Group employs more than 1 500 people and is headquartered in Riga, Latvia.

The key to the success of Akciju Sabiedrība ELKO Grupa, as the parent company, is the long-term strategy for cooperation with vendors developed over the years, a centralized purchase system, and the functionality of business-process and financial management.

Financial analysis

Akciju Sabiedrība ELKO Grupa consolidated turnover in six months of 2021 reached USD 914m (EUR 759m) which is a 1.58% increase over the corresponding period in 2020. Gross profit reached USD 60.6m (EUR 50.3m), an increase of 17.62% compared to the same period of previous year. Increase in gross profit is explained by general shortages in supply of goods which created deficit practically in all groups of products. However, shortages in supply, which started already in 2020, led to increase of proportion of advance payments for the good. At the same time, goods delivery time and transportation costs increased. The mentioned change in logistic cycle and increase in advance payments for goods led to increase in stock level.

Prospects

The Company's performance is and will be influenced by macroeconomic, competitive and political factors and the development of markets where the Company has cooperation partners. The key factors driving the Company's growth were significant expansion of the product portfolio, and the addition of new distribution areas to existing distribution agreements during the year. Consequently, ELKO Group managed to grow faster than the market as a whole.

The stabilization of CIS market conditions and the trend towards slow growth, recent expansions, as well as Company's management strategic and operational efforts allow the Company to estimate that it will continue to grow in coming year. In the light of given market risks, management has assigned priority to the continuous management of working capital.

Financial risk management

Multi-currency risk

The Company operates internationally and is exposed to foreign exchange risks accordingly, primarily from the US dollar, euro, Russian rouble, Romanian lei and Swedish krona. Foreign exchange risks arise from future multi-currency transactions and the recognition of assets, liabilities and long-term investments in a variety of currencies.

The purchase of goods is predominantly in US dollars, but sales are conducted in different currencies. In the CIS region, the main currency is US dollar and Russian rouble, but in the Baltics, trade is conducted in euros. CEE countries Slovakia and Slovenia trade in euros, but Romania in its national currency – the Romanian lei. In the Nordic region, most sales are transacted in Swedish krona.

The Company has shareholdings in foreign currencies and is therefore exposed to foreign currency risk when financial assets and liabilities denominated in foreign currencies are translated into the presentation currency – the US dollar.

Currency risk is actively mitigated by using different tools. The Company has centrally developed and globally applied currency risk management policies and procedures.

Management report (cont'd)**Financial risk management (cont'd)*****Interest-rate risk***

The Company utilises short-term borrowing for the partial financing of its current assets. All of the borrowings are at floating rates, thus exposing the Company to interest rate risks.

Credit risk

Credit risks arise from credit exposure to outstanding trade receivables. The Company has implemented procedures and control mechanisms to manage credit risks. Credit risk is partly minimized through credit-risk insurance, but mainly the risk is minimized by internally developed conservative credit-monitoring policies. Individual risk limits are set based on internal or external ratings in accordance with the credit policy. The utilisation of credit limits is regularly monitored.

Inventories

The Company determines the amount of inventories based on expected future demand and market saturation. Any changes in demand and/or rapid obsolescence of products or technological changes will result in excess stock and the accumulation of obsolete items. The Company makes centralised plans for the purchase and sale of products. Furthermore, upgrading the procedure for placing orders has helped decrease inventory days. Weekly inventory analysis minimises the need to establish provisions for obsolete items.

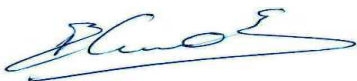

The risk related to product flow management is partially reduced through price-protection arrangements under the cooperation agreements with major vendors. The agreements provide the rights to claim compensation on pre-ordered goods in the warehouse in cases of price reduction or declines in market prices.

Liquidity risk

Prudent liquidity-risk management includes maintaining sufficient cash, the availability of funding from a sufficient number of committed credit facilities. In the future, the Company's management plans to increase the liquidity reserve based on the expected cash flows by improving the management of working capital.

Events after the balance sheet date

In April 2021 SPA agreement has been signed on acquisition of 100% share of IT Smart Distribution SRL (Romania). The transaction has been closed in June 2021, thus it will be consolidated into Elko Group financials starting from July 2021. On June, 14 bonds issued by Akciju Sabiedrība ELKO Grupa, have been admitted to trading on Nasdaq Baltic First North bond market. Otherwise, there have been no subsequent events after the last date of the reporting period that would have a significant effect on the financial position of the Company as at 30 June 2021.

The estimated average tax rate for 6 months ended 30 June 2021 is 13.4 % (the estimated tax rate for 6 months ended 30 June 2020 was 22.3%). The difference is mainly due to differences in profitability in the Group's subsidiaries in the respective countries, as well as the Group's policy on recognizing deferred tax assets.

The Company has no dilutive potential shares therefore diluted earnings per share are equal to basic earning per share.

Basic earnings per share are calculated by dividing the profit attributable to equity holders of the Company by the weighted average number of ordinary shares in issue during the year. There were no treasury shares.
