

## **Nexstim Receives NBS 6 Therapy System Order from New US Customer**

*Press release, Helsinki, 19 August 2026 at 9 AM (EEST)*

Nexstim Plc ("**Nexstim**" or "**Company**") has received an order for an NBS 6 from a new customer in the United States. The system will be used for therapeutic applications.

The order comprises an NBS 6 Therapy Base Unit, cleared by the U.S. Food and Drug Administration (FDA) for the treatment of Major Depressive Disorder (MDD) in adults and adolescents and as an adjunct for the treatment of Obsessive Compulsive Disorder (OCD). The delivered configuration includes Nexstim's non-disposable solution with re-usable head trackers, supporting increased sustainability, clinical efficiency and cost-effectiveness.

The NBS 6 leverages Nexstim's proprietary SmartFocus® nTMS technology, which enables accurate and precise targeting of the stimulation area by visualizing the induced electric field in the brain. This supports personalized treatment delivery and reproducibility across therapy sessions, independent of device operator.

Mikko Karvinen, CEO of Nexstim, comments: *"We are pleased to see leading U.S. clinics choosing the latest version of our technology. Therapy applications require exceptional precision, safety, and flexibility, and we are proud that our NBS 6 system helps clinicians and researchers meet these demanding requirements in a highly specialized field."*

### **About Nexstim Plc**

Nexstim is a Finnish, globally operating growth-oriented medical technology company. Our mission is to enable personalized and effective diagnostics and therapies for challenging brain diseases and disorders.

Nexstim has developed a world-leading non-invasive brain stimulation technology for navigated transcranial magnetic stimulation (nTMS) with highly sophisticated 3D navigation providing accurate and personalized targeting of the TMS to the specific area of the brain.

Nexstim's Diagnostics Business focuses on commercialization of the NBS System 6, which is the only FDA-cleared and CE-marked navigated TMS system for pre-surgical mapping of the speech and motor cortices of the brain.

Nexstim's Therapy Business markets and sells the NBS System 6 which is FDA-cleared for marketing and commercial distribution for the treatment of Major Depressive Disorder (MDD) in adult and adolescent patients who have failed to achieve satisfactory improvement from prior antidepressant medication in the current episode, and as an adjunct for the treatment of adult patients suffering from Obsessive Compulsive Disorder (OCD). In Europe, the NBS 6 system is CE-marked for the treatment of major depression, chronic neuropathic pain as well as post-operative rehabilitation of motor deficits of the upper limb.

Nexstim shares are listed on Nasdaq First North Growth Market Finland.
