

IT – INET Nordic – Auction Trading semi-annual periodic update

Background

Nasdaq Nordic* operates Auction Trading Market Segments to support certain less liquid instruments on **Nasdaq First North Growth Market Sweden** (MIC: SSME), **Nasdaq First North Growth Market Finland** (MIC: FSME), **Nasdaq First North Growth Market Denmark** (MIC: DSME) and **Nasdaq First North Growth Market Iceland** (MIC: FNIS). Instruments are allocated to these segments if they fulfil pre-defined criteria set out under Criteria B in Appendix AA of the Nasdaq INET Nordic Market Model.

When spreads in continuous trading become too wide, relatively small orders can cause significant price movements. Such volatility may be particularly harmful to retail investors and may affect overall confidence in market integrity. Concentrating liquidity in scheduled auctions is intended to support more robust price formation for these instruments.

Details

This IT Notice lists the instruments allocated for Auction Trading for the **fourth quarter of 2026 and first quarter of 2027 i.e. from October 15, 2026 up to and including April 14, 2027**. The next periodic update under Criteria B will be published on April 8, 2027.
