## Ovzon and SSC further broadens and deepens collaboration

**Ovzon and Swedish Space Corporation (SSC) have signed a teaming agreement to broaden, deepen and strengthen the already successfully developed partnership with the aim to develop unique sovereign space and satellite capabilities.**

Sovereign space capabilities allow a country to operate space systems independently, when and where they want. They are important for national security, economic competitiveness and resilience in today's rapidly evolving geopolitical landscape. Ovzon, with its disruptive Ovzon 3 satellite, and SSC, with its extensive space service portfolio, are uniquely positioned to support these vital objectives for Sweden, the Nordics, and NATO allies for multi-domain operations across the air, land, and maritime domains.

"This is a strategic teaming between two very complimentary organizations that will be able to deliver the most advanced and unique solutions in a very challenged world both from a geopolitical, total defense and sustainability perspective" says Charlotta Sund, CEO of SSC.

"Our mission is to connect and protect people, societies and organizations for a better, more secure and sustainable world. With Sweden's entry into NATO, Ovzon is proud to stand at the forefront of SATCOM innovation. The partnership with SSC creates a broad and deep portfolio of relevant solutions for immediate implementation. We look forward to a continued partnership, enabling Sweden and its allies to face the challenges of today and tomorrow", says Per Norén, CEO of Ovzon.

### **About Ovzon**

Ovzon offers world-leading integrated mobile satellite communications services, SATCOM-as-a-Service, to customers globally. The services combine high throughput satellite networks, mobile satellite terminals, gateway services, and dedicated customer support. Ovzon's offerings meet the growing demand for mission critical connectivity for customers with high performance, mobility and resiliency requirements such as Defense, National security and Public safety. On July 5, 2024, commercial service commenced on Ovzon's proprietary developed geostationary satellite Ovzon 3. Ovzon has offices in Stockholm, Sweden as well as Herndon, VA and Tampa, FL in the USA. Ovzon is listed on Nasdaq Stockholm Small Cap. For more information, visit [www.ovzon.com](http://www.ovzon.com).
